## PROFESSIONAL SUMMARY

AI/ML Engineering student (B.E. CSE-AI&ML, CGPA 8.18/10) with proven experience building and deploying ML systems. Designed a face-recognition voting platform presented at ICGMRFT 2026 International Conference — achieving >95% accuracy for 1,000+ users. Proficient in Python, TensorFlow, OpenCV, and Flask. Seeking an AI/ML internship to build impactful, production-grade systems.

## TECHNICAL SKILLS

|             |                                                                                                                                                            |
|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Languages:  | Python, C, C++, Java                                                                                                                                       |
| AI / ML:    | Machine Learning, Deep Learning, NLP, Computer Vision, Model Evaluation, Transfer Learning, Feature Engineering, Hyperparameter Tuning, Data Preprocessing |
| Frameworks: | TensorFlow, Keras, Scikit-learn, OpenCV, Flask, NLTK                                                                                                       |
| Libraries:  | NumPy, Pandas, Matplotlib, Seaborn                                                                                                                         |
| Web & DB:   | HTML, CSS, JavaScript, MySQL, SQLite, REST API Integration                                                                                                 |
| Tools:      | Jupyter Notebook, Google Colab, VS Code, Git & GitHub                                                                                                      |
| Core CS:    | DSA, OOP, DBMS, OS, Computer Networks                                                                                                                      |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |             |
